CSC242 Introduction to Artificial Intelligence
Project 1 Submission Form

Complete this form using a PDF viewer/reader, save it, and submit it with your code on BlackBoard.

Last name: First name: NetID:

Did you do Part 1? Yes

- Where are the abstract elements based on the formal model of adversarial search defined?

- Where are the specific implementations of those elements for this term's game defined?

- Where is your implementation of the MINIMAX algorithm?

- What class or file do we run to run your program for part 1?

- Does it play quickly and pefectly? Yes   No

Continues on next page...

Did you do Part 2? Yes

- Where can we find your implementation of H-MINIMAX?

- Where can we find the definition(s) of your heuristic function(s)?

- Where can we find your implementation of alpha-beta pruning?

- What class or file do we run to run your program for part 2?

- Comment very briefly on how well and how quickly it plays.

One last question:

- Java programmers: Do you have a nice, short, clear `main` method that creates instances of your other classes and runs the game?

  Check one: Yes   No   I don't know

- Python programmers: Did you use good object-oriented design, with classes, avoiding global functions and variables, and doing very little outside of any method or function?

  Check one: Yes   No   I don't know

Put any other comments or instructions in your README.txt (or README.pdf) file.
